CONTENTS

VOLUME 55 NUMBER 1 JANUARY 1992

Notice

I SI units, conversion factors and abbreviations

Articles

Thomas M. Cooper, Keith A. Obermeier, L. V. Natarajan and Robert L. Crane 1 Kinetic study of the helix to coil dark reaction of poly(spiropyran-L-glutamate)

Katrin Bastyns and Yves Engelborghs 9 Acrylamide quenching of the fluorescence of glyceraldehyde-3-phosphate dehydrogenase: reversible and irreversible effects

Klaus M. Hahn, Susan Bane Hastie and Richard J. Sundberg 17 Synthesis and evaluation of 2-diazo-3,3,3-trifluoropropanoyl derivatives of colchicine and podophyllotoxin as photoaffinity labels: reactivity, photochemistry, and tubulin binding

Camillo A. Ghiron, Maurice R. Eftink, David A. Engler and Salil K. Niyogi 29 Fluorescence studies with human epidermal growth factor

J. T. Arnason, B. Guèrin, M. M. Kraml, B. Mehta, R. W. Redmond and J. C. Scaiano 35 Phototoxic and photochemical properties of sanguinarine

D. T. Ribeiro, C. Madzak, A. Sarasin, P. Di Mascio, H. Sies and C. F. M. Menck 39 Singlet oxygen induced DNA damage and mutagenicity in a single-stranded SV40-based shuttle vector

Carin Thomas, Randall S. MacGill, Glenn C. Miller and Ronald S. Pardini 47 Photoactivation of hypericin generates singlet oxygen in mitochondria and inhibits succinoxidase

S. Biade, J. C. Mazière, L. Mora, R. Santus, P. Morlière, C. Mazière, S. Salmon, S. Gatt and L. Dubertret 55 Photosensitization by Photofrin II delivered to WI26VA4 SV40-transformed human fibroblasts by low density lipoproteins: inhibition of lipid synthesis and fatty acid uptake

Jacques Kagan, Tian P. Wang, Isabelle A. Kagan, R. W. Tuveson, G.-R. Wang and Jörgen Lam 63 Photosensitization by 2-chloro-3,11-tridecadiene-5,7,9-triyn-1-ol: damage to erythrocyte membranes, *Escherichia coli*, and DNA

Ronald M. Rerko, Marian E. Clay, Antonio R. Antunez, Nancy L. Oleinick and Helen H. Evans 75 Photofrin II photosensitization is mutagenic at the *tk* locus in mouse L5178Y cells

James R. Bunting 81 A test of the singlet oxygen mechanism of cationic dye photosensitization of mitochondrial damage

Yeshayahu Nitzan, Mina Gutterman, Zvi Malik and Benjamin Ehrenberg 89 Inactivation of gram-negative bacteria by photosensitized porphyrins

Shinji Yasuhira, Hiroshi Mitani and Akihiro Shima 97 Enhancement of photorepair of ultraviolet-induced pyrimidine dimers by preillumination with fluorescent light in the goldfish cell line. The relationship between survival and yield of pyrimidine dimers

Phil S. Hartman and Anne Marshall 103 Inactivation of wild-type and *rad* mutant *Caenorhabditis elegans* by 8-methoxypsoralen and near ultraviolet radiation

Kunju Joshi, Preeti G. Joshi and Nanda B. Joshi 113 Binding of hematoporphyrin derivative to brain tumor cells—a fluorescence spectroscopic study

P. S. Maruthi Sai, S. Siebzehnrübl, S. Mahajan and H. Scheer 119 Phycoerythrocyanins from *Westiellopsis prolifica* and *Nostoc rivulare*: characterization of the phycoviolobilin chromophore in both states

K. K. Karukstis, R. M. Moision, S. K. Johansen, K. E. Birkeland and S. M. Cohen 125 Alternative measures of Photosystem II electron transfer inhibition in anthraquinone-treated chloroplasts

Research Notes

Alan R. Morgan, Dimitris Skalkos, George Maguire, Ashraf Rampersaud, Greta Garbo, Rick Keck and Steven H. Selman 133 Observations on the synthesis and *in vivo* photodynamic activity of some benzochlorins

T. Takemura, N. Ohta, S. Nakajima and I. Sakata — 137 The mechanism of photosensitization in photodynamic therapy: chemiluminescence caused by photosensitization of porphyrins in saline containing human serum albumin

Technical Note
Robert M. Sayre and Lorraine H. Kligman — 141 Discrepancies in the measurement of spectral sources

Review Article
Barbara W. Henderson and Thomas J. Dougherty — 145 How does photodynamic therapy work?

VOLUME 55 NUMBER 2 FEBRUARY 1992

Editorial — I

PHOTOCHEMISTRY SECTION

Article
Prashant V. Kamat and William E. Ford — 159 Photochemistry on surfaces. Excited state behavior of ruthenium Tris(bathophenanthroline disulfonate) on colloidal alumina-coated silica particles

PHOTOBIOLOGY SECTION

Rapid Communication
Edmund W. Palaszynski, Frances P. Noonan and Edward C. De Fabo — 165 *Cis*-urocanic acid down-regulates the induction of adenosine 3′,5′-cyclic monophosphate by either *trans*-urocanic acid or histamine in human dermal fibroblasts *in vitro*

Articles
Helmut Görner, Malgorzata Wala and Dietrich Schulte-Frohlinde — 173 Strand breakage in poly(C), poly(A), single and double-stranded DNA induced by nanosecond laser excitation at 193 nm

Giovanni Agati, Franco Fusi, Riccardo Pratesi and Antony F. McDonagh — 185 Wavelength-dependent quantum yield for $Z \rightarrow E$ isomerization of bilirubin complexed with human serum albumin

Randolph D. Glickman and Kwok-Wai Lam — 191 Oxidation of ascorbic acid as an indicator of photooxidative stress in the eye

Anne Négre-Salvayre, Nicole Paillous, Nicole Dousset, Jacques Bascoul and Robert Salvayre — 197 Wavelength dependence of photoinduced peroxidation and cytotoxicity of human low density lipoproteins

S. Chernomorsky, C. Wong and R. D. Poretz — 205 Pheophorbide *a*-induced photo-oxidation of cytochrome *c*: implication for photodynamic therapy

J. G. Montes and W. D. Taylor — 213 Cell density dependence of ultraviolet light enhanced reactivation of *Herpes simplex* type I and the large plaque effect in C3H/10T$\frac{1}{2}$ mouse fibroblasts

F. Bordin, F. Carlassare, M. T. Conconi, A. Capozzi, F. Majone, A. Guiotto and F. Baccichetti — 221 Biological properties of some benzopsoralen derivatives

Ehud Ben-Hur, Marian E. Clay, Eduardo F. Vicioso Antonio R. Antunez, Boris D. Rihter, Malcolm E. Kenney and Nancy L. Oleinick — 231 Protection by the fluoride ion against phthalocyanine-induced photodynamic killing of Chinese hamster cells

Norbert Hohl, Paul Galland and Horst Senger — 239 Altered pterin patterns in photobehavioral mutants of *Phycomyces blakesleeanus*

Norbert Hohl, Paul Galland and Horst Senger — 247 Altered flavin patterns in photobehavioral mutants of *Phycomyces blakesleeanus*

G. R. Seely and A. A. Rehms — 257 Dodecylpyridinium alkanoates stabilize dispersed chlorophyll

Fernanda da Silva Knudsen and Giuseppe Cilento 267 Chemiexcitation in the peroxidative metabolism of diethylstilbestrol. Metabolic products

Fernanda da Silva Knudsen and Giuseppe Cilento 279 Chemiexcitation in the peroxidative metabolism of diethylstilbestrol

B. Schauf, L. M. Repas and R. Kaufmann 287 Localization of ultraweak photon emission in plants

Hajime Karatani, Thérèse Wilson and J. Woodland Hastings 293 A blue fluorescent protein from a yellow-emitting luminous bacterium

Research Notes

Colette E. McGarvey, David A. Holden✠ and Morris F. Tchir 301 Quantum yield values for the decomposition of several surface-active photoreactive amphiphiles

I. L. Weatherall and L. A. Dunn 305 Variations in the chemical properties of wool fibers induced by sunlight during growth

R. O. Rahn and H. G. Sellin 309 Hoechst 33258 photosensitization 5-iododeoxyuridine-substituted DNA to 365 nm light: dependence of dehalogenation on the dye-to-nucleotide ratio

Helene Kuhn and Arthur W. Galston 313 Physiological asymmetry in etiolated pea epicotyls: relation to patterns of auxin distribution and phototropic behavior

G. R. Seely 319 On the origin of 628 nm fluorescence in certain chlorophyll preparations

VOLUME 55 NUMBER 3 MARCH 1992

PHOTOCHEMISTRY SECTION

Articles

Cheon Seok Lee and Sang Chul Shim 323 Identification and characterization of the major photoadducts formed between 1-phenyl-1,3,5-heptatriyne and undecylenic acid methyl ester

Thierry Brotin, Jacek Waluk, Jean-Pierre Desvergne, Henri Bouas-Laurent and Josef Michl 335 Electronic absorption properties of symmetrical dialkoxyanthracenes. Linear dichroism and magnetic circular dichroism

T. Brotin, J.-P. Desvergne, F. Fages, R. Utermöhlen, R. Bonneau and H. Bouas-Laurent 349 Photostationary fluorescence emission and time resolved spectroscopy of symmetrically disubstituted anthracenes on the *meso* and side rings: the unusual behavior of the 1,4 derivative

PHOTOBIOLOGY SECTION

Articles

Krzysztof Reszka, J. William Lown and Colin F. Chignell 359 Photosensitization by anticancer agents—10. *ortho*-Semiquinone and superoxide radicals produced during anthrapyrazole-sensitized oxidation of catechols

Amalia Rodríguez, Francisco F. De la Rosa, Manuel Galán, Francisco Sánchez and Maria Luisa Moyá 367 Kinetic salt effects in the photochemical reaction between $^*Ru(bpy)_3^{2+}$ and Fe^{3+}

Gary B. Leisman and Margaret E. Daub 373 Singlet oxygen yields, optical properties, and phototoxicity of reduced derivatives of the photosensitizer cercosporin

H. Grajek, C. Bojarski, G. Żurkowska and R. Drabent 381 The influence of fluorescence concentration quenching on the emission anisotropy of flavins in glycerine–water solutions

L. E. Quintern, G. Horneck, U. Eschweiler and H. Bücker 389 A biofilm used as ultraviolet-dosimeter

David Kessel and Cathy Erickson 397 Porphyrin photosensitization of multi-drug resistant cell types

Rashmi Tyagi, G. Srinivas, Deepak Vyas, Ashok Kumar and H. D. Kumar 401 Differential effect of ultraviolet-B radiation on certain metabolic processes in a chromatically adapting *Nostoc*

Bernd Stein, Peter Angel, Hans van Dam, Helmut Ponta, Peter Herrlich, Alex van der Eb and Hans J. Rahmsdorf 409 Ultraviolet-radiation induced *c-jun* gene transcription: two AP-1 like binding sites mediate the response

Carol L. K. Sabourin, Abbie G. Freeman, Donna F. Kusewitt and Ronald D. Ley 417 Identification of a transforming *ras* oncogene in an ultraviolet radiation-induced corneal tumor of *Monodelphis domestica*

Catharine M. L. West and James V. Moore 425 Mechanisms behind the resistance of spheroids to photodynamics treatment: a flow cytometry study

Natalie Rebeiz, Carole C. Rebeiz, Sean Arkins, Keith W. Kelley and Constantin A. Rebeiz 431 Photodestruction of tumor cells by induction of endogenous accumulation of protoporphyrin IX: enhancement by 1,10-phenanthroline

Peter A. Ensminger and Eberhard Schäfer 437 Blue and ultraviolet-B light photoreceptors in parsley cells

Angela Agostiano, D. Christopher Goetze and Robert Carpentier 449 Cyclic voltammetry measurements of the photoelectrogenic reactions of thylakoid membranes

Research Notes

Mi Hong Yun, Seung Ju Choi and Sang Chul Shim 457 A novel photoadduct of 4,5′,8-trimethylpsoralen and adenosine

M. Sträßle and G. Stark 461 Photodynamic inactivation of an ion channel: gramicidin A

Ashootosh Doshi✠, Aneeta and Sudhir K. Sopory 465 Regulation of protein phosphorylation by phytochrome in *Sorghum bicolor*

Kenji Iwatsuki 469 *Stentor coeruleus* shows positive photokinesis

Vladimir Ya. Shafirovich, Elena E. Batova and Peter P. Levin 473 Triplet radical ion pair state of the Zn-porphyrin–viologen dyad as a magnetic field sensitive probe of phase transitions in small unilamellar vesicles

VOLUME 55 NUMBER 4 APRIL 1992

477 Obituary

PHOTOCHEMISTRY SECTION

Article

Feng Bao and Clifford P. Kubiak 479 Photochemistry of *trans*-[Rh(bis(diphenylphosphino)ethane)$_2$X$_2$][PF$_6$]: transient absorbance kinetic studies of metal–halogen bond homolysis

PHOTOBIOLOGY SECTION

Articles

Ravinder Jit Singh, Jimmy B. Feix and B. Kalyanaraman 483 Photobleaching of merocyanine 540: involvement of singlet molecular oxygen

Mohamed Ouzafe, Patrick Poulet and Jacques Chambron 491 Photoacoustic detection of triplet state and singlet oxygen in highly absorbing samples

M. Kaneko, S. Iwahata and T. Asakura 505 Quenching of photoexcited 4,4′-dicarboxy-2,2′-bipyridinebis(2,2′-bipyridine)-ruthenium(II) by oxygen in aqueous solution and in silk fibroin membrane

Thomas P. A. Devasagayam, Thomas Werner, Hans Ippendorf, Hans-Dieter Martin and Helmut Sies 511 Synthetic carotenoids, novel polyene polyketones and new capsorubin isomers as efficient quenchers of singlet molecular oxygen

R. Marchesini, N. Cascinelli, M. Brambilla, C. Clemente, L. Mascheroni, E. Pignoli, A. Testori and D. R. Venturoli 515 *In vivo* spectrophotometric evaluation of neoplastic and non-neoplastic skin pigmented lesions. II: discriminant analysis between nevus and melanoma

Ayse Baker and Jeffrey R. Kanofsky 523 Quenching of singlet oxygen by biomolecules from L1210 leukemia cells

M. J. Ashwood-Smith, O. Ceska, P. J. Warrington, T. F. Morris and M. Altamirano 529 The photobiological activity of 5-geranoxypsoralen and its photoproducts

Reza Dabestani, Robert H. Sik, Ann G. Motten and Colin F. Chignell 533 Spectroscopic studies of cutaneous photosensitizing agents. XVII. Benzanthrone

Hiroyuki Yamada and Kotaro Hieda 541 Wavelength dependence (150–290 nm) of the formation of the cyclobutane dimer and the (6–4) photoproduct of thymine

A. Fourtanier, J. Labat-Robert, P. Kern, C. Berrebi, A. M. Gracia and B. Boyer 549 *In vivo* evaluation of photoprotection against chronic ultraviolet-A irradiation by a new sunscreen Mexoryl® SX

Gulshan Ara, Archana Varshney, Chul S. Ha, Allan R. Oseroff, Terence S. Herman and Beverly A. Teicher 561 Multiple modality treatment of carcinoma cells with $Pt(Rh\text{-}123)_2$ plus x-ray plus light

R. Baumgartner, N. Fuchs, D. Jocham, H. Stepp and E. Unsöld 569 Pharmacokinetics of fluorescent polyporphyrin Photofrin II in normal rat tissue and rat bladder tumor

G. Bottiroli, A. C. Croce, R. Ramponi and P. Vaghi 575 Distribution of di-sulfonated aluminum phthalocyanine and Photofrin II in living cells: a comparative fluorometric study

M. Dellinger and D. Brault 587 Uptake and retention of Photofrin® by cultivated human lymphoblastic cells (Reh6): preferential affinity of the cells for a minor component demonstrated by normal phase chromatography

Katherine M. F. Warpeha, Lon S. Kaufman and Winslow R. Briggs 595 A flavoprotein may mediate the blue light-activated binding of gaunosine 5′-triphosphate to isolated plasma membranes of *Pisum sativum* L.

P. E. Karlsson, R. A. Bogomolni and E. Zeiger 605 High performance liquid chromatography of pigments from guard cell protoplasts and mesophyll tissue of *Vicia faba* L.

Zhan-Gong Zhao and Gordon Tollin 611 Chlorophyll photosensitized electron transfer reactions in lipid bilayer vesicles: generation of proton gradients across the bilayer coupled to quinone reduction and hydroquinone oxidation

Research Note

Michel Havaux and Reto J. Strasser 621 Antagonistic effects of red and far-red lights on the stability of Photosystem II in pea leaves exposed to heat

Technical Note

Sharon A. Miller, Robert H. James, Stephen M. Sykes and Janusz Z. Beer 625 Photoaging effects on spectral transmittance of plastic filters

Book Reviews 629

VOLUME 55 NUMBER 5 MAY 1992

Editorial III

Rapid Communication
